Development Goals
1. Training professionals in the field of finance.
2. Using projects, internships, and certification systems to cultivate professional knowledge in finance.
3. Providing students with solid educational and research resources.
4. Developing risk-management-related courses.
5. Cultivating student expertise and experience in the internationalization of the finance industry.
6. Offering a variety of educational programs (including master’s programs, four-year technical programs, two-year technical programs, five-year junior college programs, and two-year junior college programs) to meet the needs of the finance industry.

Curriculum Features
1. Foreign language ability: to enhance students’ foreign language ability in order to cope with established language trends around the globe.
2. Research and innovation: to cultivate systematic thinking and analytical skills of the students and equip them with R&D capabilities.
3. International finance knowledge: to cultivate students’ ability to analyze international financial trends and apply their knowledge through internships/work placements
4. Finance and banking courses: to develop expertise in students planning on working in finance and banking industries and to prepare them for their chosen work environment.
5. Financial information ability: to cultivate knowledge and integrate the ability to think independently, allowing students to follow global economic trends and encourage innovative thinking.
6. Financial services license: to actively encourage students to obtain licenses, and to actively participate in related training courses. The acquisition of certain licenses is a graduation requirement.
7. Social awareness: to promote students’ interest in and appreciation for the arts, encouraging them to care for the society we live in and to participate in community service.
